Each Additional Child	\$1.00	\$1.50	

What does a Family Math Night or Math Fair at Our School or Organization Look Like?

Family Math Nights are an opportunity to invite parents and children to enjoy an evening of mathematics while Math Fairs are an opportunity for children during a school day or an afterschool program to gain positive experiences with mathematics. Yes, it is possible to have positive experiences and enjoy mathematics!

The Metamo4ic Math Center will bring 15 activities for families and children to explore for an hour and a half (90 minutes). Activities are aligned and meet National Council of Teachers of Mathematics (NCTM) standards. Each child attending the Family Math Night/Math Fair receives a scorecard to enter responses from the activities. At the end of the event, children turn in their scorecards. The scorecards are left with your school or organization. Scorecards may be used to track data on the children during the Family Math Night/Math Fair, and also serve as an entry in a drawing for a grand prize if your school or organization chooses the prize option. If the prize option is selected, children also receive their choice of two small prizes when they turn in their scorecards.

The Math Center sets-up and takes down the booths in the gym.

Your school or organization is asked to provide a minimal number of tables and chairs for the Math Center to use during the event.

It is recommended that volunteers facilitate each booth, and the Math Center provides directions for each volunteer.

Math Center Specialists work with volunteers and help facilitate Family Math Nights/Math Fairs by traveling booth to booth to help get the children engaged and having fun with the activities.
